Drum

To make your own recycled Hand Drum you will need:

- An empty tin or box
- Something to decorate it with – paint, stickers, sticky tapes and marker pens are all suitable.
- You can also tie a ribbon or cord round it to make it easier to hold.
- Use the lid as the playing surface – leaving it undecorated gives a better sound. You can also remove the lid and stretch a piece of plastic cloth across the tub and secure it with a large wide rubber band or elastic for a different sound.

Play the drum with your hands or with a ‘drum stick’ such as an old wooden spoon — you can decorate this too with paint or felt-tip pens.
